Technical Skills

Languages and Libraries

Python · PyTorch · Hugging Face · Transformers · spaCy · pandas · NumPy

Speech and NLP

Montreal Forced Aligner · Whisper · Praat · NLTK

Data and Deployment

Git · Streamlit · FastAPI · Docker · SQL · Google Colab

Languages (Human)

English (native) · French (C2) · Spanish (C1) · Italian (B2) · Portuguese (B2)

Interests

Piano (Honours in AMEB Practice of Music 8th Grade; High Distinction in AMEB Musicianship 4th Grade)

Furniture design and making

Hiking (Patagonia, Swiss Alps, Dolomites, New Zealand)

Machine Learning Engineer – NLP, Speech Processing & Multilingual AI

NLP engineer with a linguist's instincts — combining **academic grounding** in **phonology, morphology and multilingual syntax** with **hands-on experience** building **speech pipelines and transformer-based translation systems**.

Particularly **interested in multilingual NLP, pronunciation analysis** and **human–AI communication systems**.

Avid **linguist fluent in English, French, Spanish, Italian and Portuguese**.

Transitioning from a senior design career into ML engineering, bringing strong **project leadership and communication skills alongside self-directed technical training.**

Certifications

- **AI Engineer** Career Path **(Codecademy)**
- Data Scientist: **Natural Language Processing Specialist (Codecademy)**
- **Data and Programming Foundations for AI (Codecademy)**

Open Source Contributions

hermes – live translation and language learning bot

- Developed Telegram bot performing real-time translation from speech or text input.
- Integrated speech recognition and multilingual translation models for conversational interaction.
- Added linguistic analysis features including morphological, syntactic and semantic explanations.
- Designed as a language-learning tool providing contextual grammar feedback during conversation.

English to French Translator

- Built a **seq2seq translator** on **LSTM** (v1) and **transformer** (v2) architecture.
- **Preprocessed bilingual corpus** with custom tokenisation and split pipelines.
- **Fine-tuned training model** with Seq2SeqTrainer.
- Evaluated using **BLEU score** and **qualitative linguistic error analysis.**

Speech Feedback App

- Built a speech analysis pipeline using Whisper for transcription and Montreal Forced Aligner for phoneme-level alignment.
- Extracted acoustic features (pitch, intensity, pause duration) using Praat and Python signal processing.
- Implemented automatic detection of filler words and long pauses
- to quantify fluency and speech confidence.
- Developed interactive UI using Streamlit for real-time feedback.

Professional Experience

jan '19 – now

Senior Urban Designer and Landscape Architect, University Urban Design Tutor – Gillespies (London), Urbis & Deicke Richards (Brisbane)

- **Led multidisciplinary design teams** on **large-scale urban projects.**
- **Managed client presentations** and **technical coordination.**
- **Developed strong project management** and **communication skills.**

Education

jan '18 – dec '19

Master of Urban and Regional Planning (The University of Queensland)

- **GPA** of **6.7/7**

jan '15 – dec '17

Bachelor of Linguistics and French (The University of Queensland)

- **Dean's Scholar Award;** Mary Munro Scholarship for **Highest Score in Foreign Language Study; GPA** of **6.65/7**

'15

Diplôme Approfondi de Langue Française C1

- **Professional fluency** in spoken and written **French**
